IMP Evolutionary Series 1987-1997

The GPE, 1990

Funded by the New Technologies Group at IBM Hursley Park UK, consistent with their brief to explore the new technologies of 'multimedia', workstations with high resolution displays and object-oriented programming. This project employed a games programmer and games graphic artist to explore the concepts of 'information modelling' and the highest quality 'active, interactive' displays; also a generic object-oriented toolkit for 'hypermedia'.
